STUDY in JAPAN

Study in Japan Global Network Project in **Middle East & North Africa**

J-MENA

Why study in Japan?

- High level of education : More than one hundred Japanese universities listed in THE world University ranking 2019.
- You can learn the world's leading science and technology, etc.
- English courses are offered in various fields : Undergraduate and Postgraduate.
- Reasonable academic fees : both at Public and Private Universities.
- Safe at any time : Low crime rate and resilient society for natural disaster.
- Diversity of Religion: Friendly for any religion.
- For Muslim/ma students : masjids and halal food are available in major cities.

What you can learn in Japan?

Computer Science

Mechanical Engineering

Energy Engineering

Aerospace Engineering

Agricultural and Life Science

Economics & Business Management

Law & Public Policy

Literature

Arts & Design

English Course

English Course is Available

Japanese universities provide degree programs in English both at undergraduate and graduate level.

Student Support & activities

① Japanese universities offer a comprehensive range of support services to ensure our students' health and wellbeing, and to help students get the very best out of their academic and extracurricular student lives.

② Japanese universities offer a wide range of extra-curricular activities that provide all kinds of opportunities to meet students sharing similar interests.

③ There are opportunities to participate in local events like festivals, music events, or, as well as opportunities to interact with people in Japan.

J-MENA Project Partner Universities

Doshisha University

Our founding spirit consists of three main principles: Christianity, Liberalism and Internationalism. Doshisha was founded by Joseph Hardy Neesima in 1875 as the first Japanese school advocating the teaching of Christianity. Doshisha has more than 29,000 students and about 1,500 of them are from outside Japan.

URL ▶ <https://www.doshisha.ac.jp/en/index.html>

Hiroshima University

Hiroshima University is a national institution founded in 1949, incorporating many different institutions of higher education. The University has been growing ever since; adding new schools, research institutes, and centers. Today it is counted among the national universities and consists of 12 schools, 11 graduate schools, a research institute, research facilities, and affiliated hospitals. The University has approximately 11,000 undergraduate students and 4,500 graduate students currently enrolled, as well as around 1,900 international students from approximately 70 different countries.

Today, HU is making steady progress as a global university, taking on worldwide challenges and strengthening its global educational network by signing international exchange agreements with universities around the world and opening overseas bases at strategic locations.

URL ▶ <https://www.hiroshima-u.ac.jp/en>

Kyoto University

Kyoto University was founded in 1897 in the City of Kyoto, Japan's historic center of art, culture, and scholarship. Since its founding, the university has cultivated a distinctive academic tradition emphasizing the value of free and open-minded dialogue and fostering a spirit of individuality and autonomy in its scholars. Our university boasts 10 Nobel Prize winners. Our graduates routinely go on to play important roles in both national and international affairs as key players. Kyoto University currently comprises 10 faculties, 18 graduate schools, 13 research institutions, and 23 educational institutes and other establishments. Approximately 2,600 of the university's 23,400 students hail from overseas, with students from over 110 different countries and regions, our campuses boast a rich culture diversity.

URL ▶ <https://www.kyoto-u.ac.jp/en/>

Niigata University

Niigata University (NU) has a long history and a rich tradition, with its predecessor organizations dating back about 150 years. Since its founding, the university has played a vital role as a center of higher education and advanced research in Japan, aiming to contribute to world peace and development, blessed with an abundance of nature offering the ideal environment for students and researchers. With a student body of approximately 12,000 students and 3,000 academic and administrative members, today, NU has developed into a large-scale, comprehensive university with two campuses, a university hospital and several research institutes including the Brain Research Institute and the Research Institute for Natural Hazards and Disaster Recovery. Bachelor's, Master's and Doctoral degree programs at NU cover a wide range of academic fields: humanities, education, law, economics, science, medicine, health sciences, dentistry, engineering and agriculture. NU actively promotes independent and creative studies for our students while also striving to be an international base for higher education and advanced research by promoting collaborative research and education with overseas universities and institutions.

URL ▶ <https://www.niigata-u.ac.jp/en>

Osaka University

Osaka University was the sixth imperial university in Japan, founded in 1931 with the strong support of the citizens, businesses, and governmental leaders of Osaka. It has been recognized as one of the leading research universities in the world and is at the forefront of technological and social innovation.

Numerous prominent scientists have worked at Osaka University such as the Nobel Laureate in Physics Hideki Yukawa. It is the 4th best ranked higher education institution in Japan (71st worldwide) in 2019 by the QS World University Rankings.

In October of 2007, Osaka University and Osaka University of Foreign Studies merged, continuing our development as one of the most prominent comprehensive research universities in the nation.

We now have 11 undergraduate schools, 16 graduate schools, 6 research institutes, 2 hospitals, 4 libraries and 17 collaborative education research facilities on campus, including national joint-use facilities. In addition, we have World-leading research centers such as Immunology Frontier Research Center (iFReC) and the Center for Information and Neural Networks (CiNet).

URL ▶ <https://www.osaka-u.ac.jp/en/index.html>

Shibaura Institute of Technology

Shibaura Institute of Technology (SIT) is a private university of science and engineering located in Tokyo, Japan. Since its foundation of 1927, SIT has consistently focused its efforts to nurture practical engineers, taking the founder Shiro Arimoto's words "Nurturing engineers who learn from society and contribute to society" as its philosophy. In view of the need of the times, SIT reinterprets the spirit as "Nurturing engineers and scientists who learn from the world and contribute to global sustainability" and is promoting reform under the strong leadership of management.

URL ▶ <https://www.shibaura-it.ac.jp/en/>

Tohoku University

Since its establishment in 1907, Tohoku University has always emphasized the three principles "Research First", "Open Door" and "Practice Orientation". Many brilliant students graduated in its 111 years' history and we are proud to say, that our research achievements had and continue to have a substantial impact on both the academic world as well as the global community. The continued collaborations and innovations are a major reason for our selection as one of the first three Designated National Universities by the Japanese government in June 2017.

URL ▶ <https://www.tohoku.ac.jp/en/>

Tokai University

Tokai University is a private university established by Dr. Shigeyoshi Matsumae in 1942 to nurture young people who can contribute to the world peace. Tokai University consists of 7 campuses in Sapporo, Takanawa, Yoyogi, Shonan, Isehara, Shimizu, and Kumamoto, which are composed of 19 undergraduate schools made up of 75 majors and 19 graduate schools. The total student population is about 30,000 and 1100 of those are international students. Tokai University has six offices abroad (Denmark, Vienna, Hawaii, Korea, Thailand and Vladivostok), and maintains academic exchange agreements with more than 125 universities/organizations in 39 countries.

URL ▶ <https://www.u-tokai.ac.jp/english/>

J-MENA Project Partner Universities

Tokyo Institute of Technology

Tokyo Tech is the top national university for science and technology in Japan with a history spanning more than 130 years. Of the approximately 10,000 students at the Ookayama, Suzukakedai, and Tamachi Campuses, half are in their bachelor's degree program while the other half are in master's and doctoral degree programs. International students number 1,800. There are 1,200 faculty and 600 administrative and technical staff members.

In the 21st century, the role of science and technology universities has become increasingly important. Tokyo Tech continues to develop global leaders in the fields of science and technology, and contributes to the betterment of society through its research, focusing on solutions to global issues. The Institute's long-term goal is to become the world's leading science and technology university.

URL ▶ <https://www.titech.ac.jp/english/>

Tokyo University of Foreign Studies

Tokyo University of Foreign Studies (TUFS) is one of the oldest universities in Japan. Founded in 1873, this prominent university has conducted academic research on languages, cultures, and societies of all regions across the globe. When first reestablished as a university under the post-war education system in 1949, TUFS had only one undergraduate program with twelve departments.

Today, TUFS has three undergraduate schools, the School of Language and Culture Studies, the School of International Area Studies, and the School of Japan Studies; one graduate school, the Graduate School of Global Studies; and two affiliated organizations, the Research Institute for Language and Cultures of Asia and Africa, and the Japanese Language Center for International Students. In 2019, the "Joint Doctoral Program for Sustainability Research" was established in cooperation with two neighboring universities.

Currently, TUFS offers majors in 28 languages and a total of 75 languages to study. The mission of Tokyo University of Foreign Studies is to conduct research and instruction, both theoretical and practical, on the world's languages and the cultures rooted in them. We aim to provide the cultural refinement necessary to engage in international activities, and to deepen the understanding of regions around the world through the study of their languages.

URL ▶ <http://www.tufs.ac.jp/english/>

Tokyo University of Marine Science and Technology

Tokyo University of Marine Science and Technology (TUMSA) has been provided education to develop specialists who helped govern and manage ocean use in Japan. Based on its motto "Voices from the Ocean" TUMSA has focused its efforts since the merger on fulfilling its mission to help Japan develop as a maritime nation and play a role in its contributions to the international community. From this fundamental perspective, we offer students opportunities for comprehensive education and research related to the ocean with a focus on the development of highly specialized researchers and professionals. Our aim is to form an internationally outstanding center for marine education and research in order to develop specialists who will play leading roles in industry, government and academia in international settings. Furthermore, taking advantage of our specialization in oceanography, we particularly focus on promoting and advancing global scientific research in the maritime field, comprehensively covering the environment, resources and energy.

URL ▶ <https://www.kaiyodai.ac.jp/english/>

Tokyo University of the Arts

Tokyo University of the Arts was founded in May 1949 under the National School Establishment Law (Act No. 150 of 1949) through a merger of Tokyo Fine Arts School (currently the Faculty of Fine Arts) and Tokyo Music School (currently the Faculty of Music). At the time of its establishment, the university comprised ten departments in two faculties, the Faculty of Fine Arts (Departments of Painting, Sculpture, Crafts, Architecture, and Aesthetics and Art History), the Faculty of Music (Departments of Composition, Vocal Music, Instrumental Music, Conducting, and Musicology), as well as the University Library.

The Graduate School comprises four schools; the Graduate School of Fine Arts, the Graduate School of Music, the Graduate School of Film and New Media, and the Graduate School of Global Arts. The university also contains the Music High School and an education and research facility attached to the Faculty of Music.

URL ▶ <https://www.geidai.ac.jp/english/>

東京藝術大学

Tottori University

Tottori University is devoted to education, research and social contribution with its basic concept of "Fusion of Knowledge and Practice" to contribute widely to the societies of local and international communities inheriting those traditions, deepening knowledge and mastering theories through practice.

Tottori University aims to cultivate human resources who can solve problems in local communities, have international perspectives, and play an important role in society. As for the research activities, it has distinctive research facilities such as the world-famous Arid Land Research Center, Fungus/Mushroom Resource and Research Center that has the world largest genetic resources, and Chromosome Engineering Research Center working on drug development and regenerative medicine, which are publicizing many new insights to the world. In this way, Tottori University has vigorous activities across various fields with the fundamental concept of "Fusion of Knowledge and Practice" and is contributing to the advancement of local areas and the worlds as the "Bastion of Knowledge and Lands".

URL ▶ <https://www.tottori-u.ac.jp/3984.htm>

The University of Tokyo

The University of Tokyo (UTokyo) was established in 1877 as the first national university in Japan. As a leading research university, UTokyo offers courses in essentially all academic disciplines at both undergraduate and graduate levels and conducts research across the full spectrum of academic activity. The University aims to provide its students with a rich and varied academic environment that ensures opportunities for both intellectual development and the acquisition of professional knowledge and skills.

UTokyo is known for the excellence of its faculty and students, and since its foundation, many of its graduates have gone on to become leaders in government, business, and academia.

Currently, UTokyo is comprised of 10 Faculties, 15 Graduate Schools, 35 affiliated research institutes (including the Research Center for Advanced Science and Technology, and University-wide centers), three affiliated libraries and three institutes for advanced study.

Furthermore, the Faculties, Graduate Schools and research institutes have facilities associated with them; for instance, the University of Tokyo Hospital is one such facility.

In addition to the three main campuses of Hongo, Komaba and Kashiwa, facilities affiliated with UTokyo are spread throughout Japan.

URL ▶ <https://www.u-tokyo.ac.jp/en/index.html>

University of Tsukuba

Since its inception in Tsukuba Science City in 1973, the University of Tsukuba has offered a comprehensive curriculum of education, covering everything from literature and science to fine arts and physical education. Although the university's roots stretch back much further than 40 years; its origins lie in the Normal School, the first of its kind in Japan, established in 1872.

The University of Tsukuba is a future-oriented institution, and we have always sought to be an open university offering interdisciplinary education aimed at fostering internationally minded people. With faculties covering humanities, sciences, sports, and art, we are a university in the true sense of the original Latin meaning "the whole," and aim to nurture tomorrow's global leaders through a broad-ranging pursuit of academic excellence. Indeed, we seek to leverage our position in center of Tsukuba, Japan's world-leading research hub, to promote harmonious coexistence among all humankind.

URL ▶ <http://www.tsukuba.ac.jp/en/>

Waseda University

First established in early 1882, Waseda University, a top institution of higher education based in central Tokyo, has 50,000 students in 13 undergraduate and 20 postgraduate schools. It was founded on three principles: independence of scholarship, practical application of scholarship and fostering of good citizenship. Waseda's mission is to build leaders, and it does, producing seven prime ministers and countless other leaders in government, business, journalism, science, literature and the arts. Waseda is Japan's most global campus, with over 7000 international students from 120 countries, and partnerships with over 800 prominent institutions in 80 countries.

URL ▶ <https://www.waseda.jp/top/en>

J-MENA Project Partner Universities

Kyushu University

Kyushu University is one of Japan's foremost research universities. Originally founded in 1911 as one of the seven imperial universities, it has since nurtured countless educators, researchers and medical practitioners who have made positive contribution to society in Japan and beyond. Comprehensive in its scope, Kyushu University has 12 undergraduate and 18 graduate schools, in addition to the university hospital and a handful of world-class research centers. It now hosts talented students and eminent researchers from over 100 countries around the globe. As a leading comprehensive research university, Kyushu University boasts strengths across a range of disciplines, from medicine, engineering and the natural sciences to the social science and humanities.

URL ▶ <http://www.kyushu-u.ac.jp/en/>

JASSO

The Japan Student Services Organization (JASSO) is an organization under the jurisdiction of the Ministry of Education, Culture, Sports, Science and Technology of Japan. As a core and leading organization in the provision of student services, JASSO comprehensively administers scholarship programs, support programs for international students, and student life support programs. JASSO aims to foster creative individuals who can become the leaders of the next generation of society, while promoting international understanding and exchange.

What is **J-MENA** project?

Make “Study in Japan” familiar to the people

J-MENA stands for Japan-Middle East and North Africa.

- One of the regional project under “Study in Japan Global Network Project” to familiarize Study in Japan through disseminating actual figure of study in Japan and to promote academic linkage among universities in the region and Japan
- Covers 21 countries in the region
- Funded by Ministry of Education, Culture, Sport, Science and Technology (MEXT) of Japan

Dissemination of Information

Connecting Stakeholders and analyzing information to find effective way to promote Study in Japan

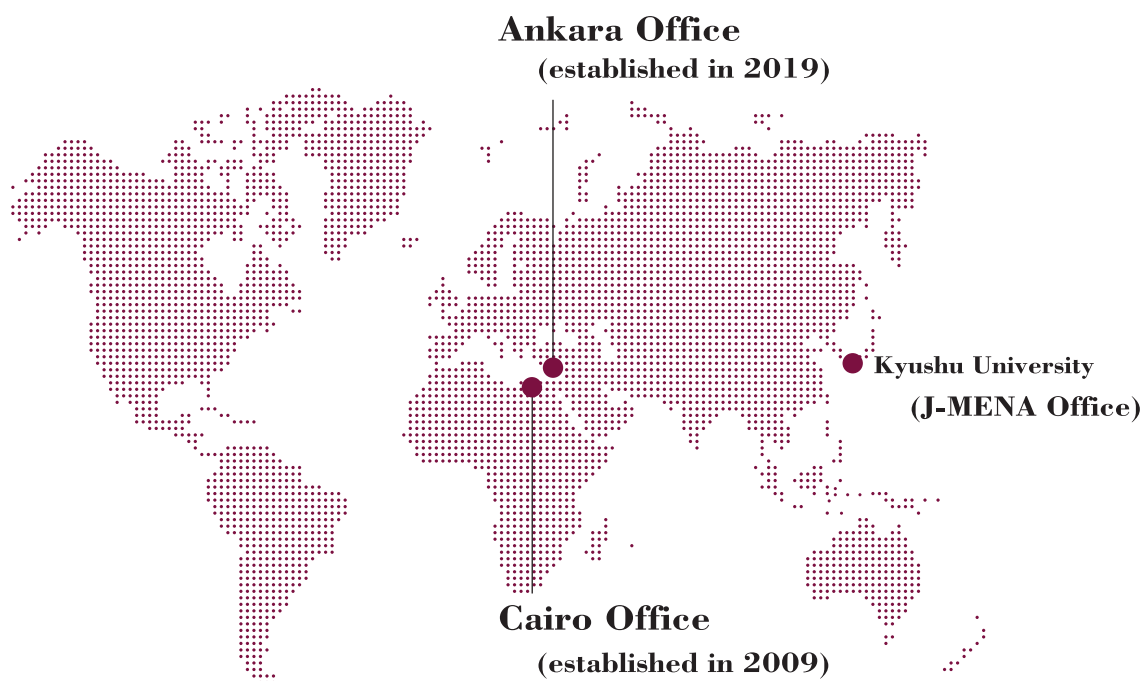

- Enhancing dissemination of information on attractive aspects of Study in Japan via Web & SNS
- Introducing live voice of students in Japan
- Exhibiting at study fairs

Connecting with Universities

- Promote student exchange program
- Supporting MoU on academic exchange
- Provide information of Japanese universities and their English programs

Connecting with Alumni Association of Japanese University

- Encouraging alumni and alumni association to disseminate their experience in Japan to potential students
